## **PROPRIETARY REPORT**

---

### **FAITH & FREEDOM NETWORK**

**APRIL 2009**

---

The information contained herein are the results of proprietary questions included in "The Elway Poll" survey at the request of the sponsor. Elway Research does not encourage publication of these results. However, in accordance with the standards of the American Association for Public Opinion Research, any release of this material must clearly state the following:

1. The findings are not those of "The Elway Poll" but are results of questions that were written and paid for by the sponsor and inserted as a proprietary question in "The Elway Poll";
2. The name of the organization that paid for the questions;
3. The size and composition of the sample (provided on "Sample Profile" page)
4. The margin of sampling error;
5. The dates of the interviewing.

Elway Research, Inc. reserves the right to correct any misinformation in a public release of findings which does not include this information.

## TOPLINE DATA

---

This summary presents response frequency distributions for proprietary questions included in The Elway Poll on behalf of Faith & Freedom Network

Telephone interviews were completed with 405 Washington state voters between April 13-14, 2009. The overall margin of sampling error is  $\pm 5\%$ . That means, in theory, there is a 95% probability that the results of this survey are within  $\pm 5\%$  of the results that would have been obtained by interviewing all Washington voters.

The data are presented here in the same order the questions were asked in the interview.

The figures in bold type are percentages of respondents who gave each answer.

Percentages may not add to 100% due to rounding.

In your opinion, should homosexuals be allowed to legally marry?

YES...**43%**  
NO...**50%**  
DK/NA...**7%**

---

## METHODOLOGY

---

- SAMPLE:* 405 Registered voters in Washington state
- TECHNIQUE:* Telephone Survey
- FIELD DATES:* April 13-14, 2009
- MARGIN OF ERROR:* The overall margin of sampling error is  $\pm 5\%$  at the 95% confidence interval. That is, in theory, had this same survey been conducted 100 times, in 95 of those times the results would be within  $\pm 5\%$  of the results reported here.
- DATA COLLECTION:* Calls were made during weekday evenings. All interviews were conducted from a central location by professional interviewers with a supervisor ratio of 1:10. Questionnaires were edited for completeness, and a percentage of each interviewer's call was re-called for verification.

It must be kept in mind that survey research cannot predict the future. Although great care and the most rigorous methods available were employed in the design of this Internet survey, execution and analysis of this survey, these results can be interpreted only as representing the answers given by these respondents to these questions at the time they completed the survey.

## SAMPLE PROFILE

In interpreting these findings, it is important to keep in mind the characteristics of the people actually interviewed. This table presents a profile of the 405 respondents in the survey.

**Note:** Here and throughout this report, percentages may not add to 100%, because of rounding.

<b>REGION</b>	Seattle .....	12%
	King County.....	18%
	Pierce/Kitsap.....	14%
	North Sound (Snohomish-Whatcom).....	18%
	West Wash (Clallam-Clark) .....	19%
	Eastern Washington .....	20%
<b>GENDER</b>	Male.....	49%
	Female .....	51%
<b>AGE</b>	18-35.....	16%
	36-50.....	21%
	51-64.....	34%
	65+ .....	29%
<b>PARTY ID</b>	Democrat .....	36%
	Republican .....	26%
	Independent.....	38%
<b>EMPLOYMENT STATUS</b>	Self Employed .....	11%
	Private Sector .....	24%
	Public Sector .....	14%
	Not Working .....	9%
	Retired.....	37%
	Student.....	4%
<b>INCOME</b>	\$25,000 or less.....	16%
	\$25 to \$50,000.....	26%
	\$50 to 75,000 .....	13%
	Over \$75,000 .....	25%
	NO ANSWER.....	21%

## **CROSSTABULATION TABLES**

---

### **READING THE CROSSTABULATION TABLES**

The crosstabulations are presented in a "banner table" format. Categories of respondents (e.g., "Age," "Gender") are listed across the top of each page (the "banner"). There are several "banners".

The questions asked in the survey are listed down the left margin. They are presented in questionnaire order. The key in the upper left corner of the table indicates which questions are found on each page.

The figures in each cell are raw numbers and percentages based on the number of respondents in the category at the head of the column.

By reading across the rows, one can compare answers to a question given by the different categories of respondents.
